

## What is Quantum Biofeedback?

Biofeedback is feedback of the body's systems. This feedback helps you focus on making subtle changes in the body, like relaxing certain muscles, to achieve the results you want, like reducing pain.

## How can Biofeedback help you?

- Identify and remove the cause of stress
- Reduce pain
- Repair damaged organs
- Clear blockages and release the flow of energy in the body
- Reduce symptoms with natural, non-invasive methods
- Correct constitutional make-up or tendencies of a person
- Improves health, performance and physiological changes.

# QUANTUM BIOFEEDBACK

Non-invasive stress detection and stress reduction through energetic training programs. Use this technology as an additional tool to help maintain your personal health

*Healing is a matter of time, but it is also a matter of opportunity-Hipocrates*

Welcome to the fascinating world of Quantum Biofeedback technology. The SCIO (scientific consciousness interface operation system) is the most advanced system of analysis and therapy available in energetic medicine today. The SCIO has a whole person focus, and communicates on the spiritual, mental, emotional, and physical levels revealing the root cause of dis-ease. It only takes 3 minutes for the SCIO to scan your body looking for energetic disturbances such as viruses, deficiencies, weaknesses, allergies, abnormalities, and food sensitivities. The highly sophisticated SCIO uses sensor harnesses attached by wires connected to the ankles, wrists, and head which provides an interface between the client, practitioner, and SCIO device. We then begin the healing journey. Enjoy the relaxing benefits today!
